

Title of the Website = Julian's Juicy Jewelry

The user will be introduced to an animated intro page advertising the premium jewels we have. They will have to create an account before they're able to purchase anything on the store front. Then there will be a menu to address what type of jewels they want i.e necklaces, watches, rings, and earrings. Then they will be able to go to their check out menu to purchase their items. If the user has questions they will be able to go to the contact us/about page.

- Introduction/Account Sign Up
- Contact us
- About
- Necklaces
- Watches
- Rings
- Earrings
- Checkout menu

The data that will be stored will be the user's account info and the calculated cost as well as the items that they add or subtract from their cart.
